

**MEMORANDUM**

**To:** Interested Parties  
**From:** Wes Anderson, OnMessage Inc.  
**Date:** July 13, 2022  
**Re:** Polling Results – SBA National Survey

*On behalf of Susan B. Anthony Pro-Life America, OnMessage Inc. is pleased to present findings and analysis from a national survey of N=1,200 Likely Voters. The survey was conducted by live interviewers July 5-7, 2022. The margin of error is 2.8%.*

Our recent survey evaluated the post-*Dobbs* environment, looking for areas of strength and for potential landmines. One of our most promising findings was the overwhelming support for pregnancy care centers. 76% of likely voters favor them, bolstered by 54% who say they *strongly* favor them – an intensity which reflects a clear majority of support. Additionally, these centers, which provide critical assistance to mothers without considering abortion, find strong support across party lines. Popular among both pro-life and pro-choice voters, pregnancy care centers stand out as well-favored options in our post-*Dobbs* country.

*As you may know, there are over 2,700 pregnancy care centers across the country that provide support for mothers facing unexpected pregnancies. These centers provide free or low-cost services for mothers but do not perform or refer for abortions. Do you favor or oppose these pregnancy care centers?*
